

NAIVEDHYAM CELEBRATION HALL, PARDI - SITE VISIT REPORT

INTRODUCTION

THE SITE BRIEF

The site is located in west Nagpur in Pardi area, and is an upcoming marriage celebration specially designed for arrive-live celebrate typology. The location is in outskirts of Nagpur but one of its kind type makes it a sought after marriage setup in the city itself.

THE DESIGN INTENT

The design intent was predominantly architects vision of delivering a quality space internally and a clutter free look externally. He materialized his vision with a team of consultants and making room for each and every service that the marriage hall will require. Idea of doing this requires a heavy thought process and design conscience so clear that doesn't lets any service go beyond concern and making room for it later. The building has to be delivered well in terms of perfect architectural product which is ready to be inhabited.

THE TYPOLOGY

The banquet halls and marriage lawns are a quite usual sight in the city but architecture for celebrations gains recognition in presentable spaces and huge clear spans. The deliverance expected is high because the spending done is for a temporary extent and the client expects a great quality outcome which the price he is shelling for.

The hotel architecture is also synonymous to such a case, with similar spatial qualitative and quantitative requirements. Relatively the requirements of clear spans, efficient HVAC and electrical requirements shoot-up. This is one of those projects where an unhappy client cannot be afforded as there are not the client but guests coming into the architectural space.

LOOKING AHEAD

The following reports gives a brief insight to the designer's point of view while building their ideas and the simultaneous sight level design manifestation equally. The scope of this report will hover around this only and help us to decode how professionals think out design projects in real time architectural world.

SCOPE

To know the practical limitations and concerns while building a design project and working out its services majorly electrical plumbing and lifts in hardcore architectural practices.
